

MR.SHOWERDOOR®

LTA-5 Sliding Tub Enclosure

This line of sliding frameless enclosures began with benchmarking every other frameless sliding enclosure on the market. Then, we went to work using the latest computer-aided design tools to create a truly superior product. All component materials were selected from among the very best available. We listened carefully to our customers' questions and concerns, and used this as our guide to building the very best enclosure possible. Even with the unparalleled quality, we have the flexibility to customize any unit to meet a particular customer's needs - unusual heights and widths present no problem...knobs or handle can be used in place of towel bars... all standard finishes are available and we can match any sample provided because we offer plated over brass products on top of our standard aluminum product.

1. RATTLE-FREE CLOSURE

Wall rail bumpers grip the glass to provide a rattle-free closure. Delrin bumpers are easy to clean and mildew resistant.

2. ANTI-JUMP DEVICES

All products contain advanced anti-jump safety devices so doors can't derail.

3. UNBREAKABLE GUIDE CLIP

Clip is made of Delrin, an unbreakable, self-lubricating plastic. Clip is black to minimize any possible future discoloration. Double fastened with high-quality 18/8 stainless steel screws.

4. EXTRA WIDE CAULK CHANNELS

Bottom track has double caulk troughs to ensure there are no leaks. Exaggerated bottom rail pitch improves drainage.

5. QUIET, SECURE SLIDING ACTION

Premium quality heavy duty sealed replaceable ball bearing wheels with round nylon tires run in a unique "V" groove for quality feel and quiet sliding action. Added runner depth prevents derailing.

6. CONCEALED HANGERS

Hangers are within header skirt. Top hanger runs the full length of the glass unlike other enclosures which typically are an insufficient 3" in length.

7. TOWEL BAR

Standard towel bar features nylon safety bushings for through-glass fasteners.
