

MR.SHOWERDOOR®

Series 10 Frameless Shower Enclosures

High-quality materials and alternative gasketing techniques give these enclosures the look and feel of pure glass. Since most projects are made to order, there is no limit on the opportunity for creative expression.

1. OPTIONAL STOP SEAL

An unobtrusive stop seal is available to resist direct water spray. In low water impact situations, the seal can be omitted to allow the door to swing in both directions.

2. PREMIUM HINGES

Our hinges are of the highest quality available and cycle tested 30,000 times. 5° pressure for when stop seal is used or 180° self centering for in/out swings are both available.

3. TUBULAR PULL HANDLE

Standard 6" through-glass pull handles. A variety of styles are available to suit any décor.*

4. LEAK PROOF DOORS

Available in easy to replace plastic design, permanent aluminum, or plated over brass with tiny replaceable "T" gasket below. Shown with optional curb dam for additional leak prevention.

SPECIFICATIONS

To ensure the utmost in safety, all tempered safety glass is compliant with all ANSI and consumer product safety commission specifications, as well as the even more stringent SGCC specifications.

All exposed glass edges are polished.

OPTIONS*

Clear glass is available in 3/8" or 1/2" thickness. Privacy and decorative glass options are also available. Can upgrade to Starphire™ ultra-clear glass and/or VistaShield® low-maintenance coating.

For stop seals and treatment below door options include high-quality 6463-T5 aluminum alloy, or brilliantly plated over real brass.
