

MR.SHOWERDOOR®

Series 60 Frameless Stall Shower Enclosure

High-quality materials and alternative gasketing techniques give these enclosures the look and feel of pure glass. Since most projects are made to order, there is no limit on the opportunity for creative expression.

1. PREMIUM HINGES

Our hinges are of the highest quality available and cycle tested 30,000 times. 5° pressure for when stop seal or miter is used or 180° self centering for in/out swings are both available.

2. TUBULAR PULL HANDLE

Standard 6" through-glass pull handles. A variety of styles are available to suit any décor.

3. SECURE CLAMPS

90° wall clip is fastened through the glass and into the wall to maximize the stability and safety of the glass.

4. LEAK PROOF DOORS

Available in easy to replace plastic design, permanent aluminum, or plated over brass with tiny replaceable "T" gasket below. Shown with optional curb dam for additional leak prevention.

5. DOOR SWING

Depending upon the situation, a small 1/8" gap allows the door to swing in as well as out. When a positive seal is required, the glass is mitered and sealed without the use of unattractive plastic sleeves.

6. UNIQUE CHANNEL SYSTEM

Bottom channel has an indent below to conceal caulking sealant. Glass rests on rubber blocks secured with black caulk to avoid discoloration.
