

MR.SHOWERDOOR®

Series 90 Frameless Channel Free Stall Enclosure

This elegant, minimalist style provides a clean, uncluttered look without any difficult to clean parts. To ensure maximum safety and stability, we use heavy-duty wall clamps that affix the glass to the walls with exceptional rigidity.

1. PREMIUM HINGES

Our hinges are of the highest quality available and cycle tested 30,000 times. 5° pressure for when stop seal or miter is used or 180° self centering for in/out swings are both available.

2. TUBULAR PULL HANDLE

Standard 6" through glass pull handles. A variety of optional styles are available to suit any décor.*

3. HIDDEN SEALS

All areas are inconspicuously sealed behind the glass. Glass is polished and radiused for a smooth, rounded edge.**

4. DOOR SEAL OPTIONS

Non-mitered doors feature self-centering hinges to ensure a true closure. Mitered doors have 5 degree offset pressure hinges so that the door edges and compression seal gaskets maintain watertight contact.

5. LEAK PROOF DOORS

Available in easy to replace plastic design, permanent aluminum, or plated over brass with tiny replaceable "T" gasket below. Shown with optional curb dam for additional leak prevention

6. LEAK PROOF SEAL

2.5" x 2.5" connectors are secured through the glass and not the tile in order to provide a leak proof seal while being strategically positioned in the corners of the enclosure to remain visually unobtrusive.
