

MR.SHOWERDOOR®

Steam Showers

STEAM ENCLOSURE WITH TRANSM

True steam sealed enclosures, using only the best seal methods, avoiding unsightly plastic sleeve gaskets. Doors are mitered and use concealed compression gaskets on the hinges side, all so subtle you only see pure glass. Optional vent shown, pivots closed for a total steam seal, or remains open so hot damp air escapes and the shower dries out. High quality German made vent hinges ensure safe precise operation of vent glass.

CORNER STALL STEAM ENCLOSURE

True steam sealed enclosures, using only the best seal methods, avoiding unsightly plastic sleeve gaskets. Doors are mitered and use concealed compression gaskets on the hinges side, all so subtle you only see pure glass.

TWIN DOOR STEAM ENCLOSURE

Framed top vents offered in two versions - side hinged vents or bottom hinged "hopper style". Both versions are completely steam sealed, and our design experts can recommend and design the correct version for your application. Also available are vents within the door.

SPECIFICATIONS

To ensure the utmost in safety, all tempered safety glass is compliant with all ANSI and consumer product safety commission specifications, as well as the even more stringent SGCC specifications.

All exposed glass edges are polished.

OPTIONS*

Clear glass is available in 3/8" or 1/2" thickness. Privacy and decorative glass options are also available. Can upgrade to Starphire™ ultra-clear glass and/or VistaShield® low-maintenance coating.

Framing options include high-quality 6463-T5 aluminum alloy, or brilliantly plated over real brass. We have channels and hardware options to meet all styles and price points.
