

Water Closets

A glass-walled water closet allows light to pass through and gives your bathroom an open and expanded feel. Glass is thinner than conventionally framed walls and waterproof so a shower enclosure can be situated adjacent to the closet – resulting in a better utilization of available space. One popular design situates the toilet on one side and the shower opposite, accessed by separate frontal doors and forming a “T”. Other creative options include acid-etched glass, and printed-on-glass lower privacy areas that enhance the beauty of the space while adding visual interest. For larger bathrooms, such as those incorporating “his” and “hers” separate bathroom areas, a spectacular long clear glass partition is a particularly striking option.

Water closet and bidet area, glass room application. The door can open in or out for convenience, vents can be added as shown in the large panel.

Sliding barn door style single panel can slide for shower or water closet use - creating ultimate use of space, where perhaps a swing door couldn't be accommodated.

If this bathroom used conventional sheet rock walls, the openness and light would have been blocked. This shows great utilization of space using the “T” method of glass to create shower and water closet areas. Also shown are acid etch privacy window covers, hinged for exterior window access.

SPECIFICATIONS

To ensure the utmost in safety, all tempered safety glass is compliant with all ANSI and consumer product safety commission specifications, as well as the even more stringent SGCC specifications.

All exposed glass edges are polished.

OPTIONS*

Clear glass is available in 3/8” or 1/2” thickness. Privacy and decorative glass options are also available. Can upgrade to Starphire™ ultra-clear glass and/or VistaShield® low-maintenance coating.

Framing options include high-quality 6463-T5 aluminum alloy, or brilliantly plated over real brass. We have channels and hardware options to meet all styles and price points.
